-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 September 2005.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,15, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Hashim et al. (U.S. Patent No. 6,772, 545)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Hashim et al. shows in figures 1-7 an attachment panel (12) having a left and right opening (the apertures in the panel 12 into which the fasteners 20 are received), a left main nut body component (18) attached to the attachment panel at the left opening and the left nut body having a plurality of license plate attachment openings (24,24), and a right main nut body component (16) attached to the attachment panel at the right opening and the right nut body having a plurality of license plate attachment openings (24,24). Hashim et al. discloses in column 4, lines 40-48 that the cross-bar (22) is sometimes not used. In these situations, the left nut component is

Art Unit: 3611

independent from the right nut component. In regard to claim 2, as broadly defined, each of the main nut body components include holes for aligning with the holes of at least two of North American license plate, Japanese license plate, Korean license plate, or Persian Gulf license plate. In regard to claim 16, as broadly defined, Hashim shows in figure 2 that the device includes a right satellite nut body (either 32 or the washer directly above 32 in figure 2) having a European hole formed therein and the left side of the device includes the same structure as the right side and would include a left satellite nut body (either 32 or the washer directly above 32).

Response to Arguments

Applicant's arguments filed Sept. 7, 2005 have been fully considered but they are not persuasive.

The applicant argues that the left nut body component and the right nut body component in Hashim et al. are connected by a cross-bar (22) which prevents them from being adjusted independently as required in amended claims 1 and 15. Hashim et al. discloses in column 4, lines 40-48 that the cross-bar (22) is sometimes not used. In these situations, the left nut component is independent from the right nut component.

Allowable Subject Matter

Claims 17-20 are allowed.

Claims 3-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
